We transform waste into high in quality materials closing the loop for fashion

The ethical and sustainable by brand that offers a range of products for the fashion industry. The focus of this collection is to give 2nd life to the waste materials.

The brand ethos is based on the core values of 3R i.e.

## REDUCE . REUSE . RECYCLE

At the heart of this collections is recycling of the pet bottles & post industrial and consumer cotton waste. Our continuous effort is to stop the wate going into landfill and oceans. This collection is an attempt at saving our planet's valuable resources and using renewable energy, harnessing solar and wind. A T - Shirt made from Ecoespin materials can save water, per bottles from landfill and green houses gases from atmosphere.

The Ecoespin collection will bring many products and solutions and we will. Continuously stove to create an ecosystem focusing on our principles of ethical and sustainable value circle

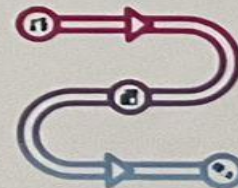

At the heart of ECOESPIN we believe core elements as a stepping stone towards sustainability

# MEANINGFUL MELANGE

# SUSTAINING SHADES

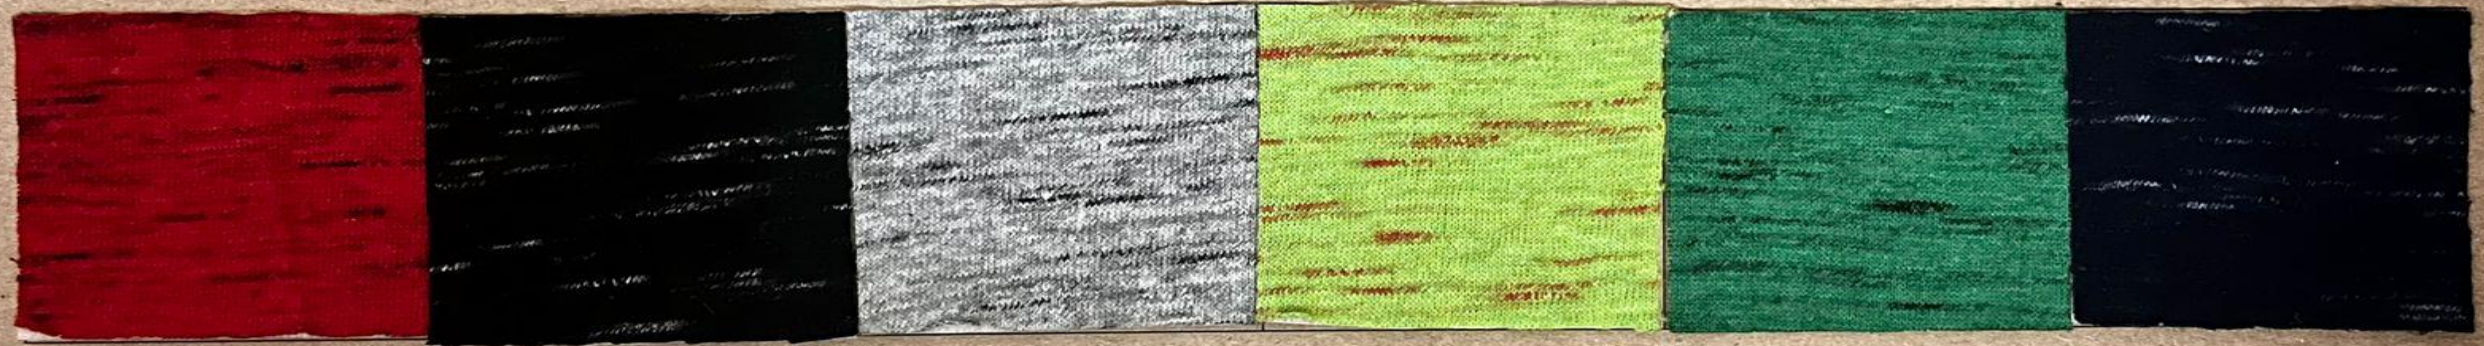

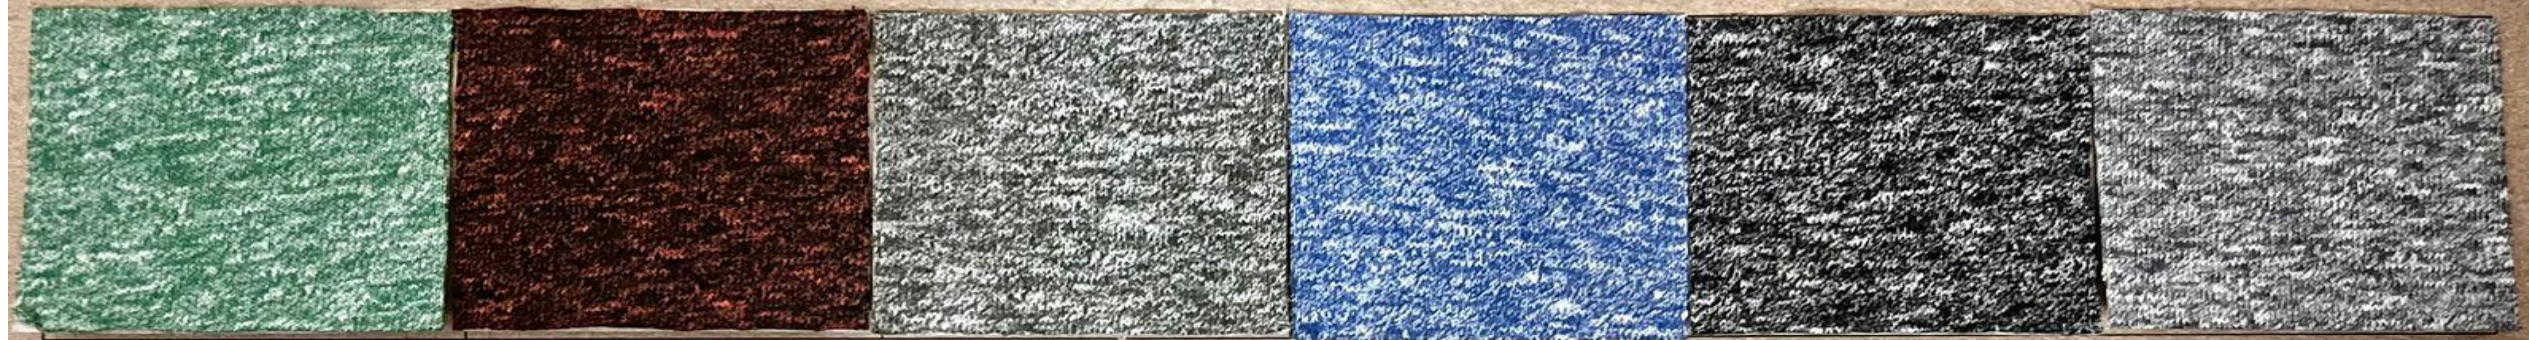

## LET'S TAKE CARE OF OUR PLANET

The shades showcased are a result of a remarkable breakthrough in the yarn industry where GM Yarn & Fabrics has made a milestone by contributing in making our earth a greener planet. Unlike traditional yarn, these are made from recycling old PET bottles and shredded open garment waste without consuming a single drop of water.

The end results are mind-blowing. Eco-friendly Polyester and cotton, Less CO2 emissions, less soil pollution and obviously More Water for our future generation.

As a result of recycling, the combination of these shades are estimated to be around 55% Polyester and 45% Cotton.

# LIVING COLORS

# LETS GO **ECO - FRIENDLY**

Fashion cuisine and Environment are the things that can never be compromised. Give your clothes and our planet a new life by replacing traditional yarn with our unique, Eco - Friendly sustainable yarns made from Recycled PET bottles and cotton coming from pre - consumed garment waste
